

Appendix 4E

Preliminary final report

Name of Entity: Etherstack plc

ARBN: 156 640 532

1. Reporting Period (“current period”): Year ended 31 December 2020
Previous corresponding period: Year ended 31 December 2019

2. Results for announcement to the market

		\$	%		31 Dec 2020 USD \$000	31 Dec 2019 USD \$000
Revenue from ordinary activities	Decreased	93	1.9%	to	4,699	4,792
EBITDA (Note 1)	Decreased	13	1.2%	to	1,080	1,093
Underlying Statutory Profit/(Loss) from ordinary activities after tax attributable to members (Note 2)	Increased	954	109%	to	83	(871)
Statutory (Loss)/Profit from ordinary activities after tax attributable to members	Increased	1,429	164%	to	(2,300)	(871)
Net loss attributable to members	Increased	1,429	164%	to	(2,300)	(871)

EBITDA and Underlying profit/(loss) from ordinary activities after tax, are non-IFRS measures used by management of the company to assess the operating performance of the business. The non-IFRS measures are not subject to audit.

Note 1. EBITDA is statutory net profit before tax adjusted to remove net finance costs, depreciation and amortisation.

Note 2. Underlying Statutory (Loss)/Profit from ordinary activities after tax attributable to members excludes an extraordinary Non-cash Finance charge of \$2,383 as previously reported in the half year financial report. The reasons for excluding this item from the underlying result are further explained in the commentary below.

2020 Results Summary and Commentary - all amounts are in USD \$000 unless otherwise indicated.

Results Highlights

- **Positive EBITDA and Positive Underlying Net profit after Tax:** US \$1.1 million EBITDA on revenue of US \$4.7 million, following FY2019 EBITDA US \$1.1 million. FY2020 revenue was also in-line (slightly down 1.9%) with FY2019 revenues of \$4.8 million due to negligible variations in project timing during the second half of the year. The underlying NPAT for FY2020, was \$83, compared to a loss of \$871 in FY2019.
- **Forward Order Book Growth:** Management has previously provided guidance that it expects FY2021 EBITDA and revenues to significantly outperform FY2020 on the basis of contract wins and strategic partnerships announced during FY2020, when combined with underlying recurring revenues.
- **Strong Positive Cashflow:** Net operating cash inflow of US \$1.7 million in 2020 following strong operating cash inflow of US \$1.4 million in 2019 and \$1.5 million in 2018.
- **Continued Recurring Revenue Growth:** Recurring revenues (support and royalty revenue) increased a further 27% in 2020 (year-on-year from FY2019), driven by long term support contracts and new royalty agreements.
- **Strategic Business Wins:**
 - The company entered a Global teaming agreement with Samsung Electronics in June 2020 to deliver next generation Mission Critical Push To Talk (MCPTT) over LTE solutions to telecommunications carriers and governments across the globe, utilising Etherstack's digital LMR (Land Mobile Radio) softswitching technologies
 - AUD\$4.1m Contract with the Australian Department of Defence. This was followed by a further Australian defence deal announced in February 2021 of AUD \$499,000.
 - New technology licensing deal in France with TPL Systemes opening a further royalty stream, including a minimum guaranteed stream of \$478.
 - Etherstack won and delivered a material deal to supply digital radio network equipment for a major resources sector company in Western Australia
- **Expansion Wins:** FY2020 saw continued repeat business for the Company's deployed large digital radio networks as used in the public safety and electric utilities industries including Ergon Energy and North American network customers.
- **Successful Delivery in the face of Covid-19 challenges:** The Company successfully delivered and commissioned a digital radio network for the Royal Canadian Mounted Police (RCMP), the federal policing agency of Canada, within the Arctic Circle.
- **Significantly Improved Balance Sheet:** The Company successfully completed a capital raise in December 2020, raising AUD\$5 million in December 2020 before costs, providing additional working capital in support of development activities, in particular activities related to the Samsung agreement and Australian Department of Defence projects

Major Projects Update (Samsung & Defence)

Etherstack is generating solid positive operating cash, has a strong EBITDA, significantly improved balance sheet and positive underlying NPAT. Management believe the Company is poised for growth.

In June 2020, the Company announced a Global Teaming Agreement with Samsung in relation to the supply of certain Etherstack technologies to Samsung for use in the global telecommunications carrier market.

By June 2020, Etherstack and Samsung were already co-operating on multiple carrier pursuits in an emerging area of technologies related to the global public safety/first responder markets. The agreement was to formalise that partnership so that both companies could commit significant further resources in the joint development and marketing of solutions incorporating their respective technologies.

Last week, Etherstack announced the award of a US\$1.2m integration agreement in relation to the global partnership arrangement, which is to provide additional funding to accelerate integration activities between the companies ahead of the initial carrier deployments.

It is anticipated that initial carrier deployments will be announced in the near term, during 2021.

Etherstack has announced two significant new Australian Department of Defence projects in the past three months, for which the initial phases total over AUD \$4.6 million. The Company has other pursuits underway and has previously advised the market of a positive exposure to Australian defence and public safety infrastructure spending.

Globally, as a result of the pandemic and its associated economic impact, management believe that unprecedented global stimulus spending will be directed to health, emergency services, infrastructure, public safety and security projects. Focus on sovereign supply chains and technology sourcing create an excellent background environment for Etherstack to operate in.

The Board looks forward to 2021 with confidence.

Revenue (All amounts are in USD \$000 unless otherwise indicated).

Total revenue in 2020 of \$4,699 was comparable to 2019 of \$4,792 with the decrease being 1.9%.

Project revenues comprising Licence fees, installation/integration and supply of wireless communications technology were \$2,368 in 2020 compared to \$2,954 in 2019. Etherstack's revenues can be impacted by a small number of large projects. While some of this volatility is the inherent nature of Etherstack project activities whereby any delay or change to project schedules can cause revenue volatility between periods, the Company witnessed slowing of project activity and revenue due to travel restrictions and uncertainty arising from Covid 19 in the second half, but the Company reports a rebound in contracted orders for FY2021 during Q4 FY2020.

2020 has seen continued growth of recurring revenue streams. Aggregate recurring revenues comprising Royalties and Support revenue streams are \$2,331 for 2020 compared to \$1,838 for 2019. The increase in 2020 represents a 27% increase over 2019. This KPI has increased 234% over the 6 years from \$697 in 2014 to \$2,331 in 2020.

Graph 1 - Recurring revenues from Support contracts and Royalty agreements 2014 to 2020 shown in USD and as a percentage of Total revenue. 2020 data is unaudited

These recurring revenues contributed 50% of total revenue in 2020 (2019: 38%). This contribution can fluctuate, however, over the medium term, recurring revenues have grown in both absolute terms, from \$697 in 2014 through to \$2,331 in 2020 and, as a percentage of total revenue, 10% in 2014 through to 50% in 2020.

Recurring revenue streams reduce overall revenue volatility and cash flow volatility and reduce dependence upon a small number of large contracts where the scale of the project and nature of the end users means timing of revenue recognition is difficult to accurately predict.

Support revenues increased in 2020 to \$1,588 from \$1,490 in 2019 following the rollout of digital radio networks in 2020 as well as incremental growth to other supported networks. Support revenues have increased from \$312 in 2014 to \$1,588 in 2020. **This is a CAGR (Compound Annual Growth Rate) of 31.2%.**

Royalty revenues are generated from licence agreements whereby equipment manufacturers pay Etherstack a licence fee per item manufactured, for the use of Etherstack technology in their products, such as base stations and handsets.

Royalty revenues increased in 2020 to \$743 from \$348 in 2019. In general, the royalties earned by Etherstack follow the increase or decrease in sales achieved by manufacturers whose products include Etherstack technology however royalty revenues can also increase when Etherstack signs a new royalty arrangement and the licensee provides minimum guaranteed volumes. In 2020, the TPL Systemes agreement provided a minimum guaranteed royalty revenue stream of \$478.

Result for 2020

Loss after income tax is \$2,300 compared to Loss after income tax of \$871 in 2019.

The key reason for the difference is a non cash finance charge of \$2,383. This \$2,383 charge is a result of the sharp increase in the Company share price on 30 June 2020 and its effect on the convertible notes valuation. While the Company has issued convertible notes in the past and continues to have convertible notes on issue at 31 December 2020, the impact on the results of the 30 June 2020 revaluation is significant and not considered to be part of the underlying result.

	2020	2019
Statutory Loss after income tax	(2,300)	(871)
Less: Non cash finance charge as at 30 June 2020	2,383	-
Underlying Statutory Profit/(Loss) after income tax	83	(871)

This improvement in underlying statutory profit/(loss) after tax is due to the combined impacts, favourable and unfavourable, of the following items:

- The gross margin on Etherstack projects varies significantly depending on the mix of Etherstack hardware, software and services content, which are at a higher margin, and third-party products where the margins earned by Etherstack are much lower. The nature of the projects in 2020 was different to the projects in 2019 and as a result the cost of sales was higher in 2020.
- Administrative costs have decreased overall due to:
 - reduced travel and marketing costs in the Covid 19 environment
 - reduced amortisation charge in 2020 of \$1,183 compared to \$1,612. There is no change to the amortisation rate however a number of projects became fully amortised in 2019 and 2020 thereby leading to a reduced amortisation charge.
 - Increased recruitment costs as the group increased the engineer labour force
- The Etherstack group has operations in Australia, United States, United Kingdom and Japan and as a consequence is exposed to gains and losses from foreign currency fluctuations between the reporting currency USD and the other currencies in which transactions are undertaken; Australian dollar, Yen, Euro and GBP. In 2020 there was a currency translation gain of \$127 compared to a loss of \$180 in 2019.
- Interest costs have decreased predominantly as a large proportion of convertible notes were converted into fully paid ordinary shares on 30 June 2020 and 1 July 2020
- Decreased revenues, as outlined above

EBITDA

EBITDA has decreased slightly to \$1,080 from \$1,093 in 2019 however EBITDA has remained positive despite the loss after tax of \$2,300 predominantly due to the add back of the amortisation charge of \$1,183 and the non cash finance charges of \$2,216 (which includes the 30 June 2020 non cash finance charge of \$2,383 on revaluation of the embedded derivative).

Intellectual property development

Etherstack remains committed to developing new technology and intellectual property assets as well as refreshing, maintaining and enhancing its existing suite of intellectual property assets.

Accordingly, Etherstack continues to invest in intellectual property development and has invested \$1,401 in the current year compared to \$1,205 in 2019. Etherstack has now invested in excess of \$22,000 into its portfolio of intellectual property assets.

Etherstack maintains the engineering skillsets and capacities to complete the developments in progress and to develop new technology to respond to opportunities in the future.

Etherstack is actively recruiting engineers across its four research and development locations in support of increased activity and a strong order book and pipeline.

Dividends

No dividends are proposed.

Record date for determining entitlements to the dividends

17. Details of entities over which control has been gained or lost

There are no entities over which control was gained or lost in the current period.

18. Details of associates and joint venture entities

Not applicable.

19. Accounting standards

The preliminary final report has been prepared in accordance with ASX listing rule 4.3A and has been derived from the unaudited financial report. The financial report has been prepared in accordance with measurement and recognition (but not disclosure) requirements of International Financial Reporting Standards (IFRS).

As such, this preliminary final report does not include all the notes of the type included in an annual financial report.

20. Contingent liabilities

There are no Contingent liabilities.

21. Any other significant information

After balance sheet date, group companies have entered into two significant contracts with customers:

- Etherstack Pty Ltd has entered into a subcontract with EOS Defence Systems Pty Ltd, a member of the Electro Optic Systems Holdings Limited (ASX: EOS) group, to supply services in relation to a project with the Australian Department of Defence. The value of

services to be provided under the contract is approximately \$385 which the Company expects will be fully recognised in FY2021.

- Etherstack Wireless Ltd, will provide Samsung a license to existing technology for the purposes of assisting integration of the joint solution aimed at the telecommunications carrier market, as previously disclosed in the Global Teaming Agreement announcement to the ASX in June 2020. This contract will generate US\$1.2m in revenue however this does not represent a sale of the solution to an end carrier customer, but instead is related to ongoing development and integration activities between the companies.

22. The report is based on accounts which are in the process of being audited.

About Etherstack plc (ASX: ESK):

Etherstack is a wireless technology company specialising in licensing mission critical radio technologies to equipment manufacturers and network operators around the globe. With a particular focus in the public safety, defence, utilities, transportation and resource sectors, Etherstack's technology can be found in radio communications equipment used in the most demanding situations. The company has R&D facilities in London, Sydney, New York and Yokohama.
